

INTRODUCTORY NOTE

This directory contains the names and addresses of physicians who are authorized to perform physical examinations and issue airman medical certificates for the Administrator of the Federal Aviation Administration. This 2004 edition follows the same format as previous editions, and contains updated Aviation Medical Examiner information compiled through Sep. 22, 2004. All International Aviation Medical Examiners (AMEs) are authorized to conduct airman physical examinations for First, Second, and Third Class Medical Certificates. In compliance with the provisions of Part 61 (13a) and Part 67 (Subpart A-67.12) of the Federal Aviation Regulations, International AMEs are not authorized to issue a combined Airman Medical and Student Pilot Certificate (FAA Form 8420-2) to a person who is neither a citizen nor a permanent resident of the United States. If an International AME sees a non U.S. citizen/resident alien who intends to come to the United States to learn to fly, the AME can perform a physical examination (Class I, II, or III) in order to determine if the applicant meets the aviation medical certification standards. If the applicant meets the standards, the International AME can issue a Medical Certificate (FAA Form 8500-9); however, he/she is not authorized to issue the Combined Medical and Student Pilot Certificate (FAA Form 8420-2).

Part 61 of the Code of Federal Regulations (Title 14) describes the various types of airman medical certificates issued by the FAA.

Part 67 of the Code of Federal Regulations (Title 14) describes the medical certification standards and certification procedures for airman medical certification.

International physicians interested in obtaining designation as an FAA AME should request application forms from the FAA Regional Flight Surgeon.
